IMPORTANT NOTICE:

The existing VPN connection between your facility and the ILHIE will be migrated over to the Illinois Department of Public Health (IDPH). Your facility's HL7/EMR immunization data to the immunization registry (I-CARE) will now be sent via Secure FTP (SFTP) directly to the proper IDPH registry.

SFTP Connection information:

NOTE: One SFTP connection will be used to report to all 3 public health registries: Syndromic Surveillance, I-CARE and ELR.

If you already have a MOVEIT/SFTP User ID for any of the public health reporting registries, you can use that same User ID to report to the other two registries.

sFTP User ID:	IDPH will provide you with new MOVEIT User account ID if you don't have an account
sFTP Password:	Will be communicated through phone call
sFTP Address:	URL: moveit.illinois.gov
	IP Address: 163.191.60.21 Port 22

You will need the following directory information to switch your facility's existing HL7/EMR Immunization data feed:

Directory for Uploads: /Distribution/DPH/ICAREHL7EXCHANGE/

For additional details on the new IDPH connection for I-CARE, please visit:
https://icarehl7.dph.illinois.gov/icare/doc?sftp

Details on the new I-CARE sFTP client (optional) are available here:
https://icarehl7.dph.illinois.gov/icare/doc?sftpclientinstall

To ensure no disruption of I-CARE data transfer, it is the responsibility of the provider site to complete these steps and move to the SFTP transfer. Failure to comply with the above steps can impact **Meaningful Use** incentives and/or the **Vaccines For Children** program.
If you are not the responsible person for the sFTP account, please forward this email to the appropriate IT staff and/or EMR vendor.

If you have any additional questions please contact:
Robin Holding
